

Product Data Sheet

Diesel Fuel Conditioner (DFC)

DESCRIPTION

Nemco Diesel Fuel Conditioner (DFC) is designed for all-season use in low sulphur diesel fuels. Formulated with the revolutionary new 9040 ZerO Series additive from Lubrizol®, this all-season fuel conditioner provides exceptional deposit control and minimizes injector fouling. DFC also provides effective anti-gel protection during cold weather operation.

Our Diesel Fuel Conditioner exhibits an outstanding ability to clean up latest technology diesel fuel injectors and provides excellent control of diesel fuel foaming tendencies. It has proven performance in both regular diesel and biodiesel fuels. Cetane improvement provides enhanced power and fuel economy.

Advantages

- Exceptional deposit control, cleans up gummed injectors
- Provides performance benefits in all seasons
- More even power distribution on all cylinders, and with reduced power loss
- Two to four percent improvement in fuel economy with a corresponding increase in power
- Cetane Improver
- Sheds water, prevents icing, eliminates frozen or gelled fuel lines
- Prevents corrosion of fuel lines
- Fuel Stabilizer during storage, extends shelf-life
- A clean burning engine means lower emissions and less pollution
- Improves diesel fuel lubrication performance, helps protect equipment

Applications

- Diesel fuelled engines

Notes

- One litre of DFC will treat 1,000 litres of fuel
- For severe use and extreme cold use one (1) litre DFC to 500 litres of fuel
