

Product Data Sheet

OptiSorb® Spill Control Solid

DESCRIPTION

OptiSorb® Premium Oil Absorbent is an all-purpose economical floor sweep product used to manage and contain occasional spills of water, oil and grease. OptiSorb® is a granular, natural diatomaceous earth based product that can absorb its own weight in liquid.

OptiSorb® is ideal for road side spills, service stations, maintenance workshops, parking areas, re-fuelling areas, paint and panel shops and automotive workshops. OptiSorb® leaves surfaces dryer and less slippery.

OptiSorb® has a low bulk density, high absorptive capacity, average surface area and relatively low abrasion.

Application

- For use on hard surfaces wherever oils, fuels, chemicals and liquids are stored, handled and spilt
- OptiSorb® is normally placed on and around a spill to “solidify” and absorb the liquid, and then swept up and recovered for disposal.

Availability

OptiSorb® is available in 11.3 kg (25 lb.) poly bags, and 80 bags (1,265 kg) per pallet.

Typical Properties

Loose Bulk Density	22 – 24 lb. / cu. ft.
Moisture Content	0.2 – 0.8%
Hardness	(ASTM E-728) > 90%
pH	6.5
CEC	47.4
Water absorption	110 %
Oil absorption	100 %
