

Product Data Sheet

PolarZone™ RV & Marine Antifreeze Recreational Vehicle and Plumbing Antifreeze

DESCRIPTION

Nemco PolarZone™ Recreational Vehicle (RV) Antifreeze is a non-toxic, environmentally friendly antifreeze, with a formula based on propylene glycol (PG). PolarZone™ RV Antifreeze is suitable for winterizing all types of potable (drinking) water plumbing systems. This product is safe to use in systems containing brass, metal, copper and plastic pipes. It is formulated to be used full strength to winterize boats, recreational vehicles, trailers, vacation homes, swimming pools, and a variety of other winter storage applications.

To maintain maximum freeze and burst protection (-51°C/-60°F), this product should not be diluted. Drain all water from the system before adding PolarZone™ RV Antifreeze and make sure that the product has worked its way throughout the system to ensure adequate protection.

Typical characteristics – RV & Marine Antifreeze

| Test | Performance |
|---------------------------|-------------|
| Appearance | Clear/Pink |
| Inhibitor agent, volume | 2% |
| Propylene glycol, volume | 38% |
| Water, volume | 60% |
| Freeze point, °C (°F) | -23 (-9.4) |
| Burst protection, °C (°F) | -51 (-60) |

Physical characteristics shown in the table are typical and may vary slightly.
